

Introduction

SPAR is the UK's leading convenience store group providing the ultimate in value and convenience shopping to local communities, offering a quality range of fresh foods through to wine, beers and household products. The SPAR franchised stores come in a range of various sizes and formats so the security needs for each one is different. Black Box Security work with all the major retailers in the Spar organisation covering the north, including James Hall, Alfred Jones, Lawrence Hunt and many smaller multi-site operators and independent retailers, to date we have secured over 200 stores. Our brief from the client was simple, deter theft, prevent loss, improve staff and customer safety and create peace of mind in store.

Total system solutions for a safer environment

Bespoke security packages for the retail market

Black Box Solution

Taking into account that SPAR stores vary in size and layout, each of the small shops and stores are attractive targets for potential criminals. The display areas are exposed to petty pilfering, or more organised theft, and in smaller shops, staff may need to be in the office or stock room – leaving the shop temporarily unattended and at risk. In addition, employee safety and security of cash are a constant concern.

We held an initial meeting with the client to identify these risk areas and proposed a bespoke solution to deter crime and provide peace of mind security. We maintained control from the initial consultation through to the installation of our systems, in order to ensure quality and on-time completion within budget. Our expertise and know-how in managing security installations for different aspects of the retail sector from independent stores to multiple outlets was a key factor in being appointed to handle the security for SPAR stores.

Conclusion

CCTV incorporating fully functional dome cameras were positioned to cover strategic point of sale areas integrated into remote monitoring. Intruder alarm systems were also installed to the latest European Standards with high security RedCARE signalling and where needed, Bandit fog generating machines to obscure the sight of intruders in the event of an alarm incident.

Why choose Black Box Security?

Black Box Security has built a reputation on over 35 years of experience in the security market providing bespoke security solutions to commercial and residential customers. Our NACOSS Gold Approval for the installation of security systems, reflects the high levels of technical expertise and commitment that is needed to protect people, property and their assets.

Based on the concept of total capability, we can provide a complete package of electronic systems and solutions to combat almost any security risk. From a stand-alone system to the integration of different security systems interfaced to a building management system we have the solution. Our one-stop service ensures you receive the support and services appropriate to your needs providing design, installation and maintenance for total peace of mind security.
