

Monitored Intruder Alarm Systems

Intruder Alarm...

makes sure that when you leave work at the end of the day your business is protected.

Monitored intruder alarm systems ensures that your business is looked after 24 hours a day, 7 days a week.

Our intruder alarm systems are individually designed, carefully installed and regularly maintained to ensure that your property is protected night and day, all year round.

In accordance with current police policy on sequential screening of activations, everything possible is done to identify genuine intrusion for immediate police response. Whether you need external detection, building security, or safeguarding of key internal areas we have the solutions to meet your specific needs.

Key Features

- Providing peace of mind protection 24 hours, 365 days a year
- Free survey and risk assessment of your premises
- New system of grading introduced, each with inherently different levels of security by design, dependent upon the degree of risk
- System design to be risk assessment led, installers now responsible for ensuring the correct grade is installed
- Sequential alarm confirmation to reduce false alarms and the withdrawal of police response
- In the event of an activation we validate the alarm, inform emergency services and notify keyholders
- Police policy insistent upon compliance with new standards
- NSI Gold approved contractor for the installation and maintenance of intruder alarm systems

Total system solutions for a safer environment

Monitored Intruder Alarm Systems

Need to protect your business 24 hours a day, 365 days a year?
Black Box Security have the solution.

Intruder theft and criminal damage represent a costly threat to your home and business. But electronic detection systems provide cost-effective protection, acting as a deterrent to intruders whilst alerting staff and police. Systems are designed for use in the widest range of applications, from single retail outlets and offices, to high-risk sites such as public utilities.

The benefits of monitored intruder alarm systems

A monitored intruder alarm system will not be ignored. In the event of an activation the signal is sent down your phone line automatically to the Alarm Receiving Centre. Operators will verify the validity of the alarm and call the police without delay. They will also contact one of your nominated keyholders so that emergency services can access your business premises.

Monitoring is required to guarantee that your premises are properly protected 24 hours a day, 365 days a year. Our intruder monitoring solutions provide essential false alarm management, integrated CCTV and public address capabilities, plus real-time fault detection.

Why choose Black Box Security?

Black Box Security has built a reputation on over 35 years of experience in the security market providing bespoke security solutions to commercial and residential customers.
